Technology Coaching BvbA

Your partner to improve and innovate by understanding your:

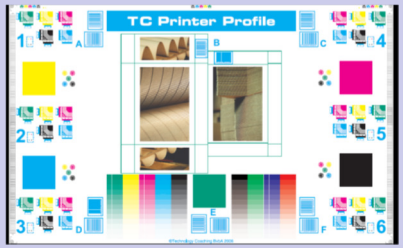

- *Customers;*
- *Products;*
- *Processes;*
- *Suppliers.*

Products:

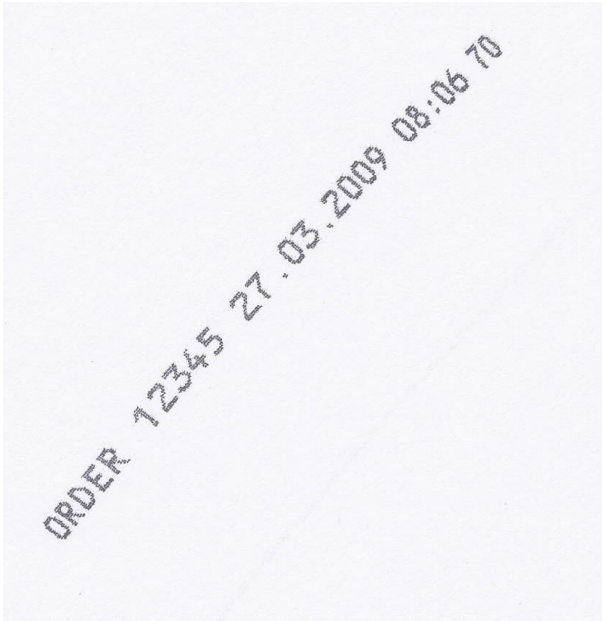

- *IFT Analyzer (Screen Roll Inspection)*
- *Press Assess (Equipment productivity evaluation);*
- *Press Manager Foundation (Colour Quality assurance);*
- *ICCSforPMF (Ink formulation and colour database).*

Services:

- *Printing press assessment;*
- *Training/Coaching;*
- *Brand colour consistency;*
- *Supplier evaluation;*
- *Material rationalisation;*
- *Product development and innovation;*
- *Printing including: digital or on-demand printing, flexo, screen printing, gravure and offset;*
- *Ink utilisation evaluation;*
- *Intellectual property.*

Digital Sample Marking Pen

Get Control over your samples and waste by marking it with the Digital Sample Marking Pen. The flexible traceability solution!

The digital pen is a handhold inkjet printer and is totally mobile! It can be used in any environment wherever you are on smooth or rough surfaces.

It allows marking your samples with individual consecutive numbers but also add order number date and time.

It prints without the use of a label.

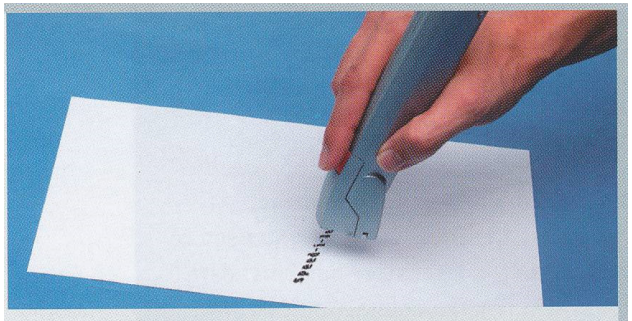

This pen gives you traceability of samples waste without writing manually. It can write 40 characters in one move of your hand.

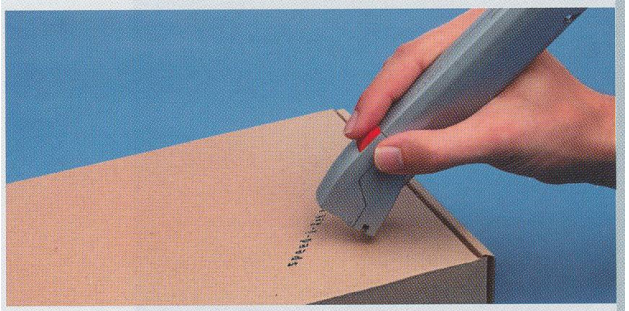

How can you use it?

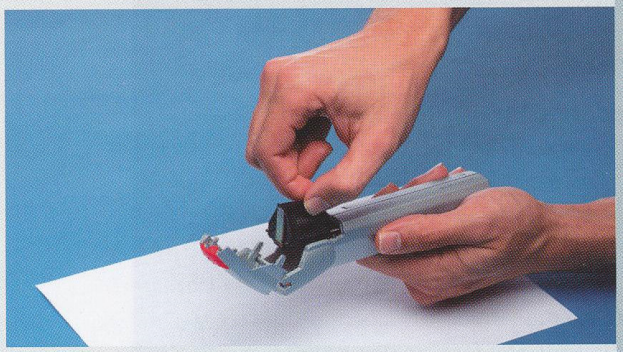

When you do a test you can fast and efficient correctly mark your samples. It is the perfect tool to use when you are doing tests in the field and need to take samples.

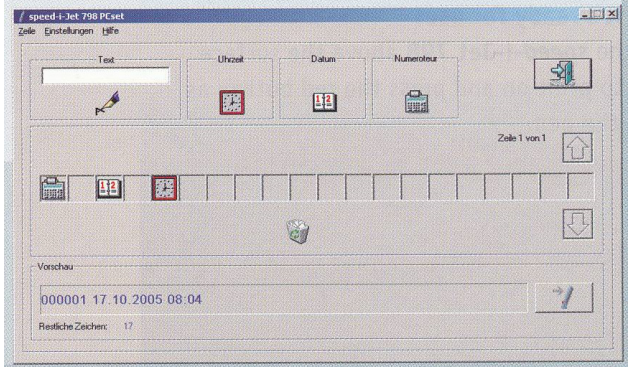

It is also a useful tool for marking waste during set-up and production. Marking your waste using the consecutive numbering option of the pen allows you to keep, fast and efficient, track of how many products/sheets you produced before production starts.

Also samples taken during production can be marked. Use the pen to print the time when the sample is taken. This provides you feed back and proofs later that the sample was taken during production and is not just the last or first sample of your production run.

Combining the time printed on the sample with your SAP system order information will show when the sample was taken during the production run on the machine. What more do you want for traceability?

The software runs under Windows Vista, 98SE, Me, NT4, 2000 and XP

Technical data	
Body colour:	Silver grey
Dimensions: (B x D x H)	32 x 43 x 173 mm
Weight:	125 g
Certificated:	CE
